What these prices cover

The next page preserves all seven products and prices visible in the merchant's current Uber Eats menu: six bottled kava options and one coconut-shell accessory. These are New Zealand delivery-platform prices, not verified in-lounge prices. No currency conversion has been applied. Platform fees, delivery, availability and final charges may differ. Check Uber Eats for delivery availability to your address. Other menu options may be available; ask the venue for its current complete selection.

The official website's Takeaway Kava collection currently says "Coming Soon"; it does not publish these prices or confirm website ordering availability. The lounge itself is operating and publishes daily opening hours.

Four Shells Kava Lounge

STEP: 1

Choose your kava

*A shell to enjoy on your own,

A group of people are gathered in an art gallery. In the background, a large, colorful abstract mural covers the upper wall. The mural features various geometric shapes, including triangles, circles, and lines, in shades of red, yellow, blue, and green. Below the mural, several people are standing and looking at the art. A woman in a yellow jacket is visible in the center. A man in a white hoodie is on the right. A woman with white hair is in the foreground, looking towards the left. The overall atmosphere is that of a museum or gallery tour.
